

## PRESS RELEASE

### The new Linutop Operating System is available: Linutop OS 3.0!

- *New OS with money saving features, offering real benefits to professionals by saving time, maintenance and deployment costs.*

Paris, October 20<sup>th</sup>, 2009 – Linutop, specialized in Small Linux PC announces today **the new version of its Operating System linutop 3.0, an energy saver operating system, minimize maintenance and deployment costs.**

**Linutop OS 3.0** is small, secure, powerful and maintenance free is perfect for professional use public internet access, digital signage in industrial environments and displays.

Linutop OS 3.0 is delivered with free standard ready-to-use Linux software: (Firefox, Open Office, VLC Media player...) and can be easily customized with additional software. The new Setup Menu allows a quick and simple configuration for a specific use.

Linutop OS 3.0 Integrates new security feature allowing locking the software and protecting the flash memory from wearing out by preventing write cycles. Once set up linutop software is protected. The computer will recover its state at each startup, minimizing maintenance costs.

Linutop OS 3.0 is USB Bootable, it can be fully backed up and run on a USB Key, simplifying the duplication of the same configuration on several Linutop, this interesting feature is a time saver for a deployment and can also be used for mass installation.

Linutop OS 3.0 Includes VNC remote management, thin client software, Network Manager, and a digital signage demo: linutop-display.

**Linutop OS 3.0 is available in 4 Versions: for Linutop 3, linutop 2 and Assus eee and live CD Demo.**

Linutop 2 is the most energy efficient with only 8 Watts power consumption.

Linutop 3 is perfect for professional use without maintenance.

Also available on a USB key for Assus eee it can directly be run from the key or internally offering all the benefits of the linutop OS on the side or as a replacement.

A downloadable ISO format bootable CD ROM demo version is available here:
